- **Softrefine Technology Pvt. Ltd.** –
  Angular Developer (From June-2021 **–** Till date)
  Location: Junagadh.

  Around 2+ year of experience as a Software Developer.

PROJECTS

- **Tennis/Football Predictions Site**
  This Project is centered on predicting tennis and football matches. It was necessary to start from scratch. This website allows users to view upcoming tennis/football match by calendar, player/team rankings, match predictions, player/team head-to-head statistics, and event information. User can also use the odds and predictions of players to gamble their money. It includes search functionality, allowing the user to look up any player or team and obtain all of the information required to make predictions.

  Responsibilities:
    - Have developed all the front-end components in Angular 12.
    - Have designed responsive UI using bootstrap.
    - Part of various team meetings for Requirement analysis and UX finalization.
    - Have worked in purely Agile methodology
    - Make it SEO friendly so integrated Server Side Rendering

  Technology used: HTML 5, CSS 3, Angular 12, Bootstrap, NestJs, RxJs, NgUniversal(SSR), REST web services

- **Share Market Toolbox**
  This project is based on share market analysis toolbox. It was required to develop from scratch. In this site user can check any company's detail, financial, market cap, share price, filter any company with share price etc.
